

CCPS MCAP Data 2022-2023 School Year

Dr. Kendra Hart, Supervisor of Title I, Testing & School Performance

Christine Hill, Local Accountability Coordinator

Caleb Yirdaw, Data Management and Reporting Coordinator

Our Objective

- What: Review achievement data from the 2022-2023 MCAP administration, compare results with the 2021-2022 MCAP administration, and identify strengths, areas of focus, and next steps.
- How: Presentation and discussion
- Why: To monitor student progress, provide multiple pathway opportunities for student success, and to inform decision-making.

MCAP Administration

- MCAP was administered to all students in grades 3 – 8 and students enrolled in Algebra I, ELA 10, Government and Biology during the 2022-2023 School Year:
- Fall Administration: December 2022 – January 2023
- Spring Administration: March 2023 – May 2023
- MCAP Performance Levels:
 - Level 4 – Distinguished Learner
 - Level 3 – Proficient Learner
 - Level 2 – Developing Learner
 - Level 1 – Beginning Learner
- Proficiency levels did not change in comparison to the 2021 – 2022 administration.

MSDE Overall Observations

- Statewide results of the latest Maryland Comprehensive Assessment Program (MCAP) assessments show notable improvements in literacy and mathematics, with literacy results surpassing pre-pandemic performance.
- Across all grades, a substantial percentage of students were on the cusp of achieving proficiency in literacy and mathematics. Between 16 and 22% of students in ELA, and between 11 and 17% of students in mathematics were on the cusp of proficiency. These students were, on average, only one to three additional correct answers from achieving proficiency.
- A lower percentage of students are scoring at the lowest performance level in literacy and mathematics.
- The progress is not isolated; it is equitable and widespread. Data shows encouraging trends across all subgroups of students.
- This year's MCAP data illuminates a hopeful trend: the targeted math interventions implemented by Maryland's educational leaders are beginning to take root, as evidenced by increased proficiency rates across multiple grade levels.

Maryland State Department of Education. (2022, August 22). *Maryland State Department of Education provides 2023 Maryland Comprehensive Assessment Program (MCAP) statewide results* [Press release]. [Maryland State Department of Education Provides 2023 Maryland Comprehensive Assessment Program \(MCAP\) Statewide Results](#)

MSDE Overall Observations ELA

- Student proficiency rates in English Language Arts (ELA) in School Year 2022-2023 are at their highest in nearly a decade with the largest single-year gain in grades 3-8 over the same time period.
- Students' literacy results surpassed pre-pandemic performance.
- For students in grade 3, the proficiency rate in literacy reached a nine-year high of 48%.

MSDE Overall Observations Math

- The percentage of students proficient in the mathematics assessments in grades 3 through 8 combined improved in school year 2022-2023 as compared to school year 2021-2022, although results have not yet returned to pre-pandemic levels. Twenty-five percent of students in grades 3-8 combined were proficient in mathematics in school year 2022-2023, which surpasses the 22% of students scoring proficient in school year 2021-2022.
- In the Algebra I assessment, 17% of students were proficient, an increase of 3 percentage points over the 14% of students scoring proficient in school year 2021-2022.

MSDE Overall Observations Science

- Grade 5 science scores have exceeded pre-pandemic levels. The percentage of students in grade 5 that met grade-level science proficiency increased nearly four percentage points, from 31% in school year 2021-2022 to 35% in school year 2022-2023.
- The 2023 MCAP science assessment saw fewer grade 8 students proficient with 26% of students reaching proficiency as compared to 35% in the prior year. Grade 8 students in school year 2022-2023 were in grade 6 during school year 2020-2021, a year of predominantly virtual education in Maryland. These students did not participate in the grade 5 science assessment due to the waiver from the U.S. Department of Education from assessments administered in spring 2020 due to COVID-19.

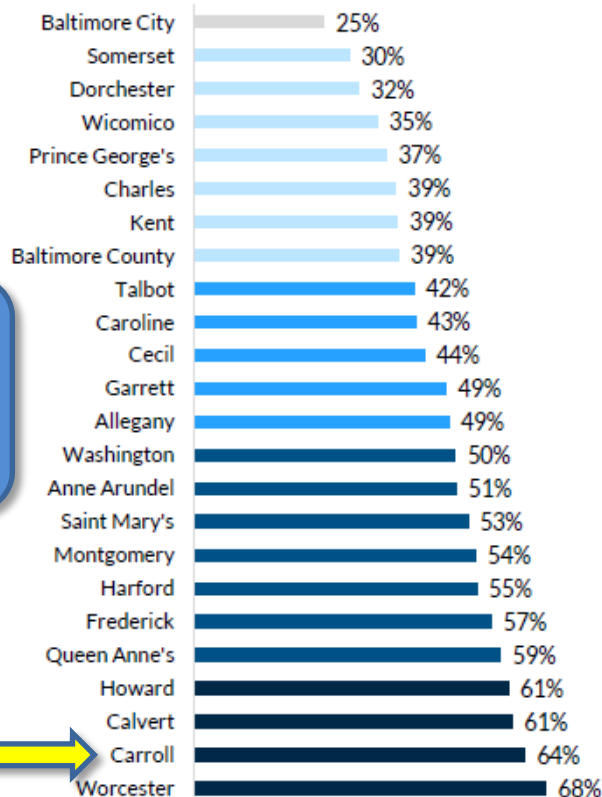

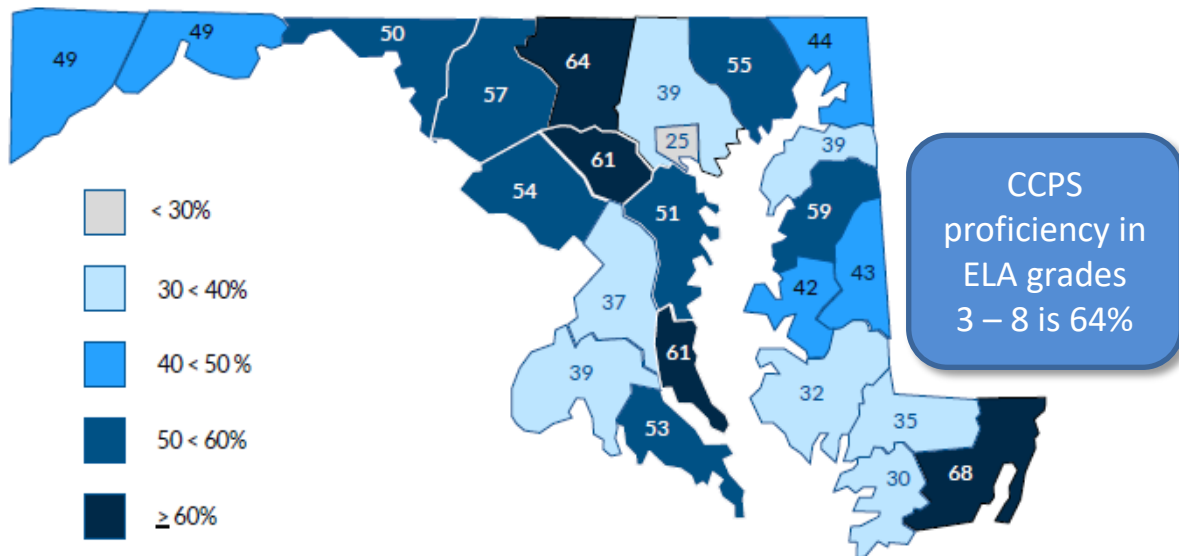

Maryland State Department of Education. (2022, August 22). *Maryland State Department of Education provides 2023 Maryland Comprehensive Assessment Program (MCAP) statewide results* [Press release]. CCPS MCAP ELA Comparison Data

English Language Arts Grade 3-8 Assessments by LEA, SY 2022-2023

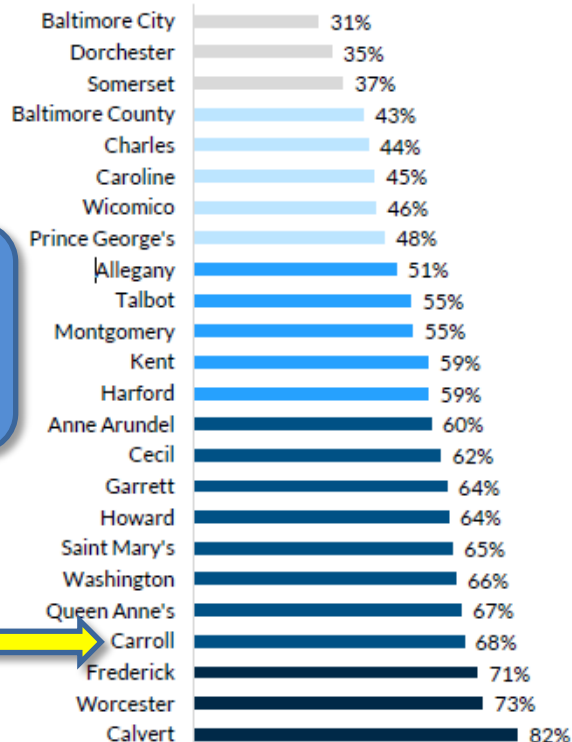

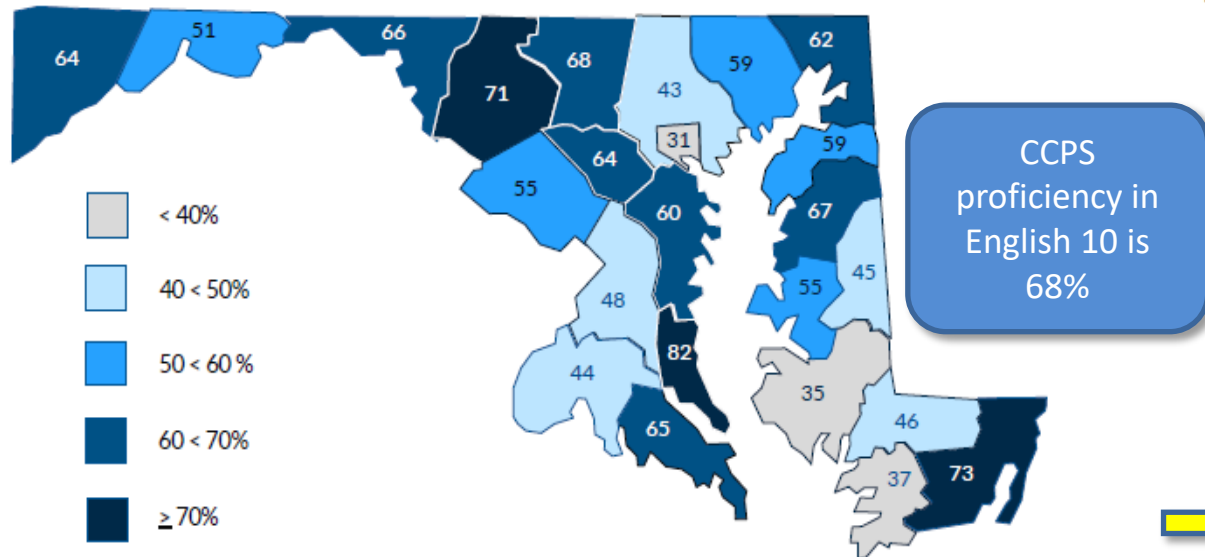

Statewide, 47% of students are proficient in ELA grade 3-8 tests. LEAs vary from a low of 25% to a high of 68% in the student proficiency rate. Twenty-three of 24 LEAs improved from SY 2021-2022 to SY 2022-2023.

Note: SY 2022-2023 data as of August 14, 2023.

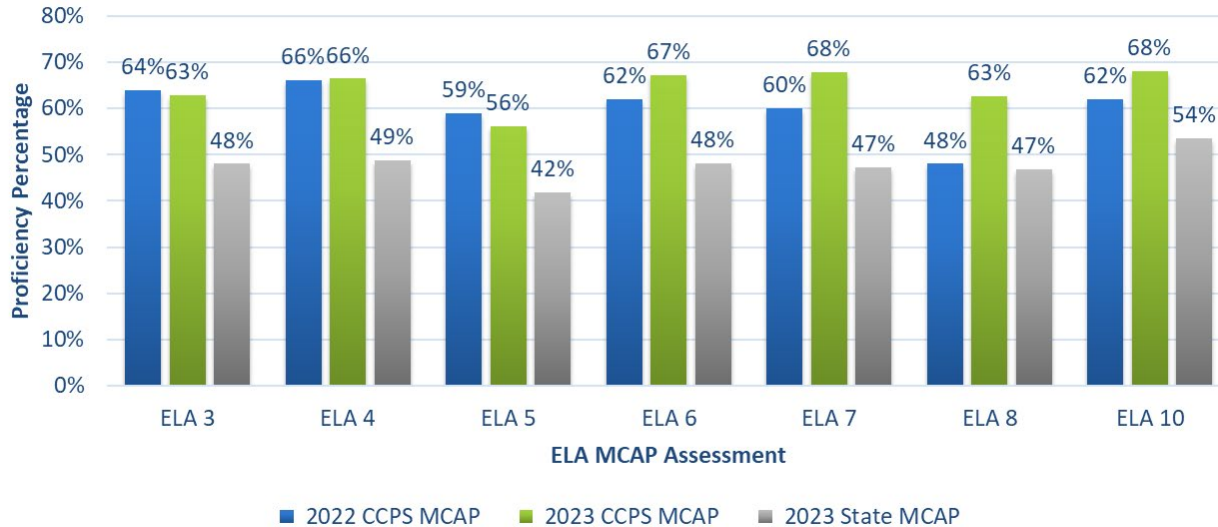

English 10 Assessment by LEA, SY 2022-2023

Statewide, the percentage of students scoring proficient on the English 10 test was 54% for SY 2022-2023. LEAs vary from a low of 31% to a high of 82% in proficiency percentage. Eighteen LEAs improved from SY 2021-2022 when comparing to SY 2022-2023 results.

CCPS MCAP Science Comparison Data

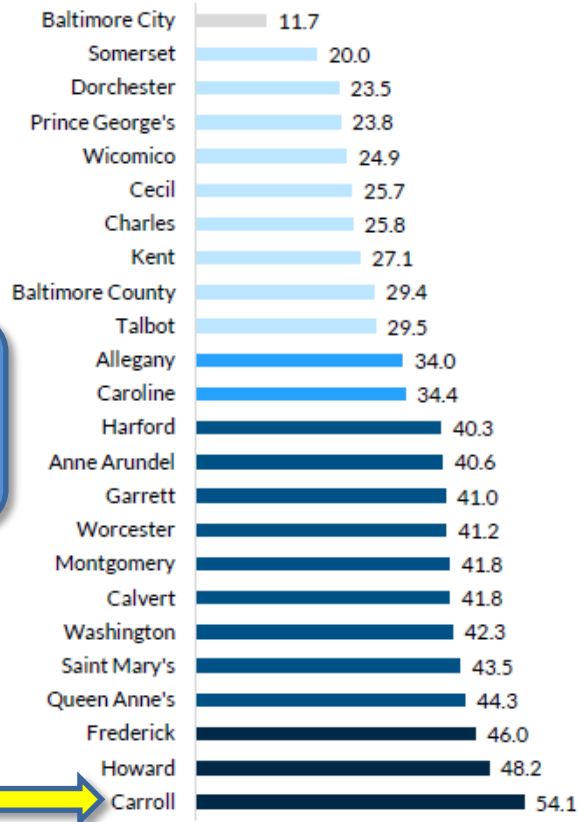

Science Grade 5 Assessment, SY 2022-2023 Proficiency by LEA

Statewide, the percentage of students scoring proficient on the grade 5 science test was 34.5% for SY 2022-2023. LEAs vary from a low of 11.7% to a high of 54.1% in proficiency percentage. Twenty-two LEAs improved their performance when comparing SY 2021-2022 to SY 2022-2023.

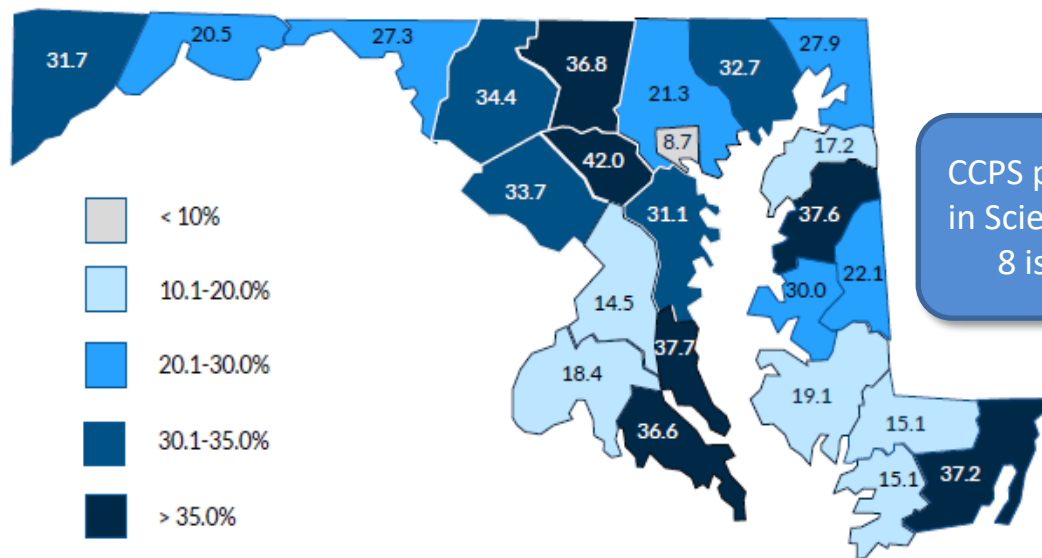

CCPS proficiency in Science Grade 5 is 54.1%

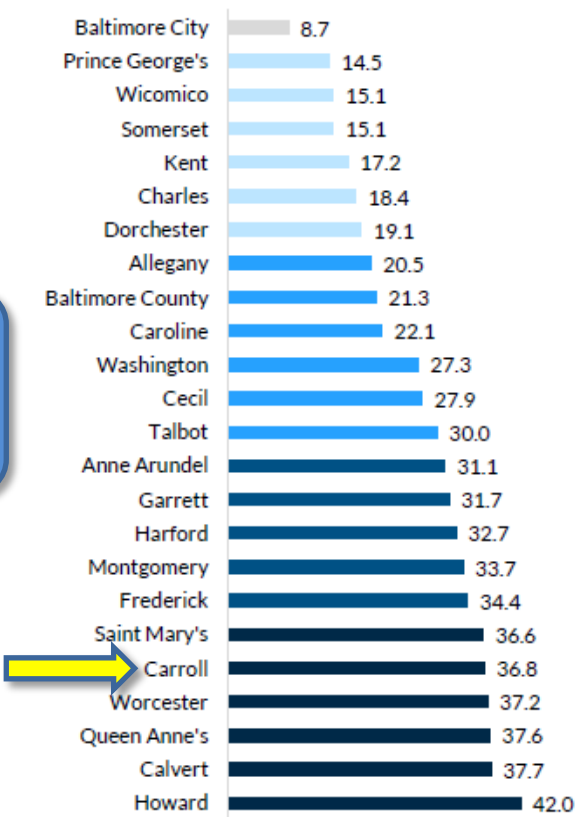

Note: SY 2022-2023 data as of August 14, 2023.

Science Grade 8 Assessment, SY 2022-2023 Proficiency by LEA

Statewide, the percentage of students scoring proficient on the grade 8 science test was 26.4% for SY 2022-2023. LEAs vary from a low of 8.7% to a high of 42.0% in proficiency percentage. Twenty-three LEAs experienced a decrease when comparing SY 2021-2022 to SY 2022-2023 results.

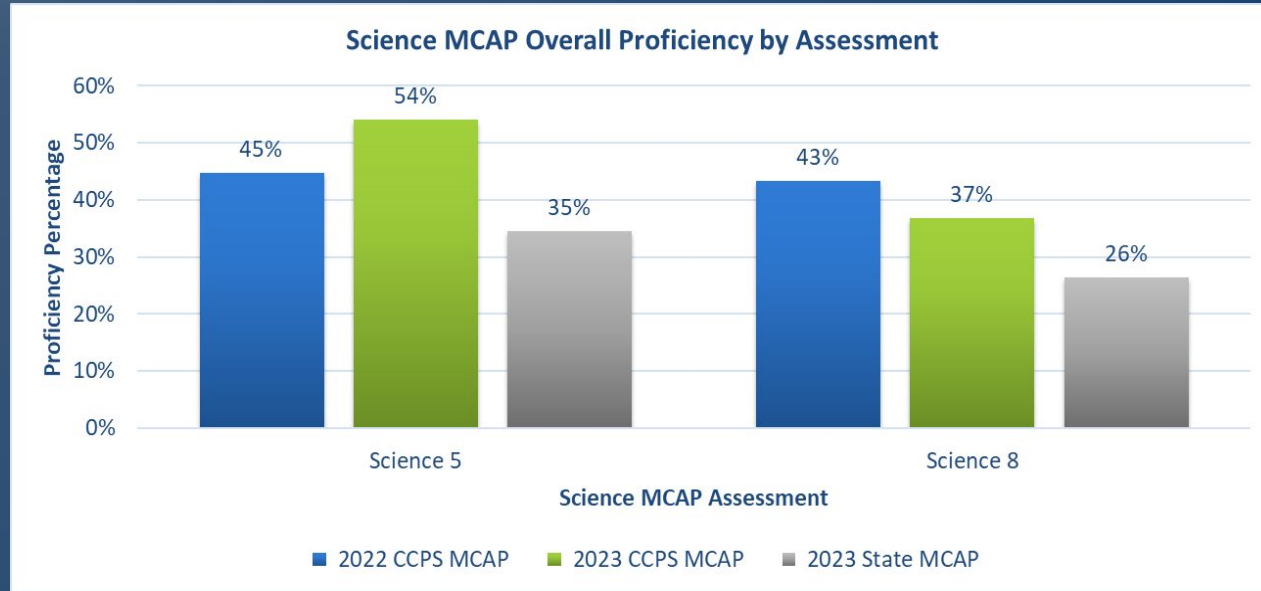

CCPS proficiency in Science Grade 8 is 36.8%

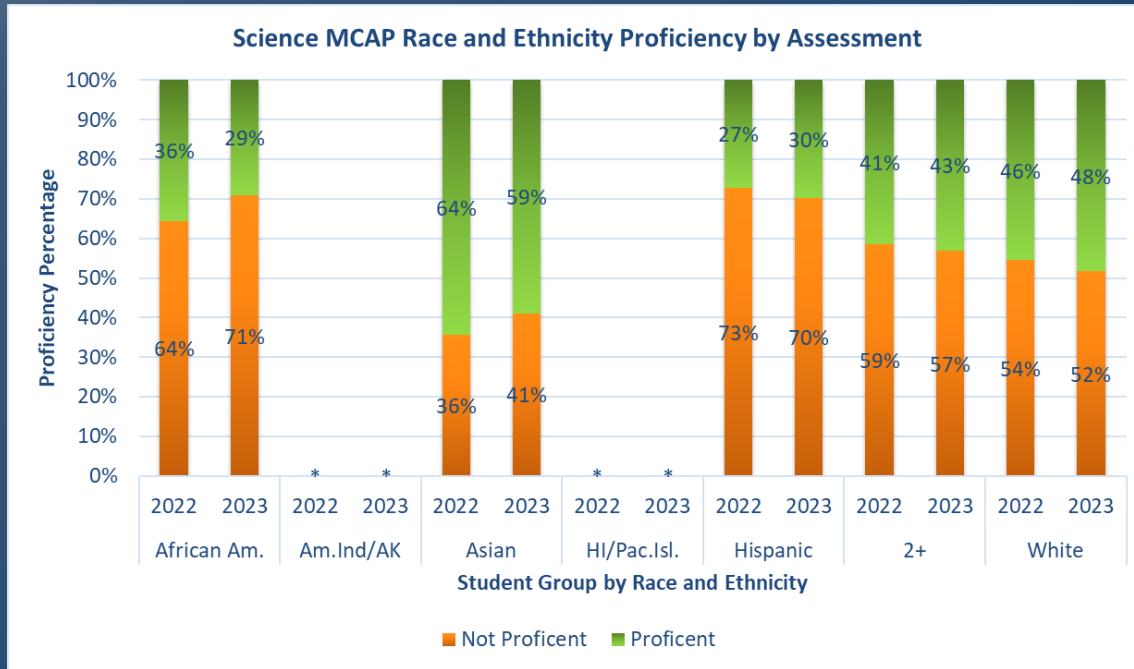

Note: SY 2022-2023 data as of August 14, 2023.

CCPS Overall Observations

- Overall, we rank well in comparison to other school districts in many of the MCAP assessments. However, we understand that we have a lot to approve upon.
- In comparison to the 2021-2022 ELA MCAP results, most student groups demonstrated an increase in proficiency and/or ranking.
- In ELA we had a slight decrease in grades 3 and 5. We have surpassed or maintained pre-pandemic levels as experienced state-wide.

CCPS Overall Observations

- Our math scores have not returned to pre-pandemic levels. Proficiency rates increased by up to 5% in grades 3-5 and in grade 8 we increased by 10%. Our FaRMs student group increased in all grade levels except in our Algebra I assessment.
- Grade 5 post pandemic science scores have increased each assessment year. Students with disabilities in grade 5 proficiency increased from 8% to 16%.
- We saw a 6% decrease in our 8th grade proficiency levels in comparison to the 2021-2022 results.

Next Steps for ELA

- Focus on triangulating local and state data in the intermediate grades (3-5) for flexible groupings and intervention support.
- Ensure training and resources for all grades 3-5 teachers in the Science of Reading as well as teachers of special populations (ESOL, Special Ed, Economically disadvantaged).
- Revise and update CCPS local assessments and benchmarks to ensure alignment to the MCAP assessments.
- Analyze and debrief local and MCAP assessment results with administrators and teachers to plan for instructional adjustments.
- Adopt and implement learning strategies based on current research for building writing fluency at the secondary level.

Next Steps for Math

- Revise, update, and develop common unit assessments that are standards aligned using MCAP evidence statements to share and compare achievement with administrators and teachers across the district.
- Implement collaborative co-teaching and planning models between classroom, math resource, special education, and ESOL teachers to provide high-quality first-pass instruction.
- Utilize lead data measures with administrators and teachers to analyze and compare student achievement across all student groups and provide targeted small-group or individual intervention based on this information.
- Expand math interventions - Bridges (Elementary) and IXL (Secondary) - to ensure the closing of learning gaps for our most struggling students.
- Implement individualized plans, aligned with Blueprint's CCR standards, for all high school students who have not demonstrated proficiency in mathematics.

Next Steps for Science

- Continue to revise newly developed common assessments to ensure alignment to the evidence statements of the NGSS and MISA.
- Strengthen collaboration between the elementary and secondary science offices and schools to analyze data and address student achievement.
- Focus on professional learning that builds teacher capacity to deliver three-dimensional instruction aligned to the NGSS.
- Continue to utilize the progressions of NGSS to evaluate coherence across the CCPS K-12 program.
- Embed appropriate support in the form of teacher guidance of model lesson resources for ESOL, Special Education, and Advanced Academics as curriculum is developed and revised.

Next Steps for Our Schools

- School Improvement Teams will further analyze school-wide, student group, and individual student MCAP data by specific standards and share results with stakeholders.
- School Improvement Teams will work with grade level and/or disciplinary teams to establish goals and actions specific to their student needs.
- Schools will compare MCAP data with local assessment data to identify trends, strengths, and determine areas in need of improvement.
- Principals will analyze system-wide data by level at Principal's meetings to determine trends within the performance data.
- Schools will engage in targeted professional learning to address the instructional needs of each school.
